

## **FHC 1" Steel Screen Door Tension Spring Nylon Roller With Angle Stop For Columbia Doors (2 Pack)**

**Item No.** B575

### **Features, Advantages, and Benefits**

- Used by Academy Uni-Fit screen doors
- Adjustable Phillips head screw on the assembly

- 1 inch diameter concave high density polyethylene roller
- High density polyethylene construction
- Polyethylene construction is lightweight

**Description:** Overview Are you having trouble sliding your screen door open or closed? Have you checked your rollers/roller assemblies? Don't replace the entire door. For a fraction of the cost of a new door, replace those worn-out rollers. This sliding screen door roller assembly insert has a high density polyethylene frame with an adjustable high density polyethylene inner housing and high density polyethylene roller. The assembly inserts into the bottom or top of the sliding screen door by snapping it into place. Roller housing adjusts to the correct position needed. This style is found on Columbia sliding screen doors, but is also used by a variety of other screen door manufacturers. Order yours today and have your door slide like new.
