

FHC Screen Door Tension Spring 1" Nylon Roller In Stainless Steel Housing/Spring

Item No. B747

Features, Advantages, and Benefits

- Used By A Variety Of Patio Door Manufacturers
- Concave Roller

- 1 In. Diameter High Density Polyethylene Roller
- Heat Treated Stainless Steel M Style Tension Spring
- Roller Assembly Is 5/16 In. Wide
- Roller Width Is 1/4 In.
- Easy To Install
- For Further Dimensional Information, Please See The Line Drawing

Description: <h2>Overview </h2><p>This is a stainless steel roller assembly, with-M shaped tension spring with a 1 in. high density polyethylene roller. It is used by a variety of patio door manufacturers. The heat treated stainless steel tension spring is 2-5/16 in. long and shaped like an M, giving it the tension needed by the screen door to slide properly.</p>
