- For Further Dimensional Information, Please See The Line Drawing

**Description:** Overview This mill finish patio door handle is a surface with hook latch style. Often found on older patio doors, it is mounted on the door's inside frame and the hook latch engages the keeper mounted on the jamb. It has a 1-1/8 in. high extruded aluminum black finished inside handle with an anti-lift feature on the hook latch. The latch profile is 3/8 in. The mounting holes are 4-15/16 in. apart. The outside handle is a low profile extruded pull. It is non-keyed but can be by ordering Prime-Line part E 2070.
