- Mounting Hardware Included
- A Phillips Head Screwdriver Is Required For Installation
- For Further Dimensional Information, Please See The Line Drawing

Description: Overview This sliding patio door handle set is constructed of diecast materials and comes in a satin nickel plated finish. The handle set is non-handed allowing it to be used on both left and right-handed patio sliding doors using 3-15/16 in. mounting hole centers. This handle set features a high profile handle and it is used to replace damaged or missing mortise/hook style handle sets on sliding glass doors. Installation instructions and all fasteners necessary for the installation of this handle set are included in packaging. The outside pull of this handle set can be converted to an outside locking pull using Prime-Line part E 2195 key cylinder adapter kit, or Prime-Line part E 2000 key cylinder. *Product Selection Tip: Besides matching the style and type of locking mechanism, the other main specification to match is the measurement of the mounting hole centers, from center-2-center. Note: Due to numerous compatible options, the internal mortise lock body is not included with this item and must be purchased separately. See Prime-Line part E 2014.
