

FHC 1-11/16" By 7/16" Nylon Roller Assembly - Art Door (Single Pack)

Item No. D1555

Features, Advantages, and Benefits

- Diecast and stamped steel housing
- Unique diecast housing design
- Housing is 7/8 in. wide
- Housing is 1-13/16 in. long

- 1-11/16 in. diameter by 7/16 in. thick concave nylon ball bearing roller

Description: Overview This is a diecast unique back that is used on Art Door patio doors. The 1-11/16 in. diameter by 7/16 in. wide roller is wider than the average roller. It is installed in a stamped steel bracket that is then installed onto the diecast housing. The housing is fitted onto the metal frame bottom rail and held in place by a #10-24 machine screw located just above the adjusting screw.
