

## **FHC 1-1/2" Stainless Steel Sliding Door Tandem Roller Assembly**

**Item No.** D1884

### **Features, Advantages, and Benefits**

- Used by Kawneer sliding patio doors
- Plain back housing with two 1/4-20 mounting holes on the back
- 1-1/2 in. diameter concave tandem stainless steel rollers
- Diecast outer housing with ball bearing rollers

- Features rear screw adjustment
- Used in incimate weather locations

**Description:** OverviewThis is an extra heavy-duty plain back tandem roller assembly used by Kawneer on their heavy doors. Often found in Hawaii, and used on door walls, it has two inline 1-1/2 in. concave or grooved stainless steel ball bearing rollers set in a heavy-duty diecast outer housing with rear adjustment. The housing is 1-1/8 in. wide, 1-13/16 in. tall and 4-1/2 in. long. There are two 1/4-20 mounting holes on the top and two on the back end.
