- Easy To Install With Only A Few Simple Tools
- For Further Dimensional And Specification Information, Please See The Line Drawing
- A Phillips Head Screwdriver Is Required For Installation
- For Further Dimensional Information, Please See The Line Drawing

Description: Overview This Sliding Window Sash Lock by Prime-Line Products is constructed of diecast materials and comes in a corrosion-resistant, black-painted finish. The mounting holes are spaced evenly apart and measure 2-1/4 in. from center to center, with a 5/8 in. latch projection. This style of sash lock does not use a separate keeper, because the latch engages directly into the fixed rail of the stationary sash to lock the window. Used on vertical and horizontal sliding windows.
