- Arm is 9 in. from middle of the guide button to the middle of the crank operator while closed
- Heavy duty diecast zinc construction with an aluminum finish
- Steel worm drive gear for durability
- Matching crank handle is included

Description: Overview This casement window operator is a right-handed aluminum square body type. It has a 9 inch steel arm with a round disc on the tip (some older styles had a small wheel instead of a disc). The disc slides in the Prime-Line part H 3529 casement track located on the bottom of the casement window. It is worm gear driven by a 3/8 inch crank spindle. The matching crank handle that fits onto the crank spindle and installation screws are included. Mounting holes available are 3-7/8 inch and 4-3/4 inch on center.
