Description: Overview This is a diecast white bronze spring catch used on project-in or project-out windows. Normally used on a casement or transom type of window that is above door height, the ring on the latch makes it easy to reach up with a transom pole and hook (Prime-Line part H 3753) and engage the latch to lock or unlock. It has mounting holes 1-3/8 in. on center with a polished white bronze finish. Make sure your keeper is in good condition.
