- Individually Wrapped to Protect Finish

**Description:**

## Overview

The **FHC 1/4" Aluminum Deep Nose J-Channels** are unique popular metals that have been used in the Industry for years. The 1/4" Deep Nose Aluminum J-Channel is commonly used for mirror installations using the Inset-and-drop method by using the Deep bar on top and regular shallow channel on the bottom. These versatile extrusions combined with other components are not only exclusive for Industrial / Commercial applications but also very popular for Residential and other applications that require protection around the edges. At **FHC** we strive to help in keep your cost down and stock what you need for all your job needs.
