**Description:** <h2> Overview </h2><p> The <b>FHC 1/4" Aluminum Standard Nose J-Channels</b> are unique popular metals that have been used in the Industry for years. The 1/4" Standard Nose Aluminum J-Channel is commonly used for mirror installations using the Inset-and-drop method by using the Deep bar on top and Standard regular shallow channel on the bottom. These versatile extrusions combined with other components are not only exclusive for Industrial / Commercial applications but also very popular for Residential and other applications that require protection around the edges. At <b>FHC</b> we strive to help in keep your cost down and stock what you need for all your job needs. </p><p></p> <p>\* Always wear the correct safety gear to protect yourself. Failure to do so may cause serious operator injury \*
