- Designed for use with sliding patio screen doors, with both left and right hand directional sliding
- Features simple install and use design
- Easy to install with only a few simple tools
- A Phillips head screwdriver is required for installation

Description: Overview This sliding screen door handle and latch is used by Bay Mills doors, as well as a variety of other patio door manufacturers of Hat Section doors. It contains a black plastic inside pull with a latch slide button and an outside pull. Mounting holes are 4-1/4 in. on center for the exterior handle and 3-1/2 in. on center for the interior handle. The steel latch slides up and down to engage the keeper (Prime-Line part A 203).
