

## **FHC 1" Plastic Screen Door Tension Spring With Roller (2 Pack)**

**Item No.** B570

### **Features, Advantages, and Benefits**

- Used on Jim Walters doors and a variety of other sliding screen door manufacturers
- 2 inch V-shaped tension spring
- 1 inch diameter concave plastic roller

- Heat treated tension spring and nylon ball bearing roller
- Easy to install

**Description:** Overview Are you having trouble sliding your screen door open or closed? Have you checked your rollers/roller assemblies? Don't replace the entire door. For a fraction of the cost of a new door, replace those worn-out rollers. This is a tension spring roller assembly has a V-shaped tension spring design that is used by a variety of patio door manufacturers. The roller is a 1 Inch diameter high density polyethylene roller mounted on the end of a heat treated steel tension spring that is V-shaped. The 2 Inch long V-shaped flat spring inserts into the screen frame giving tension required as the door slides back and forth. Order yours today and have your door slide like new.
