

FHC 1" Nylon Spring-Loaded Rollers For Sliding Screen Doors - For Columbia (2 Pack)

Item No. B617

Features, Advantages, and Benefits

- Used by several patio screen door manufacturers
- Mounting tab is on the bottom of the insert body

- 1 inch diameter concave ball bearing roller
- Aluminum frame and steel roller
- Adjustable height with Phillips head screw

Description: Overview Are you having trouble sliding your screen door open or closed? Have you checked your rollers/roller assemblies? Don't replace the entire door. For a fraction of the cost of a new door, replace those worn-out rollers. This sliding screen door roller assembly insert has an aluminum frame with a high density polyethylene inner housing and steel ball bearing roller. The assembly inserts into the bottom or top of the sliding screen door with the included screws. The roller housing adjusts up and down to the correct position needed. This style is often on Columbia sliding screen doors but is also used by very many other screen door manufacturers. Order yours today and have your door slide like new.
