

## **1-1/4" - Steel - Screen Door Tension Spring with Nylon Roller**

**Item No.** B636

### **Features, Advantages, and Benefits**

- Used By Dorwal, Guardian and a Variety of Sliding Screen Door Manufacturers
- Features a Flat Tension Spring
- 1-1/4 in. Diameter Concave Roller
- Stamped Steel Construction With Nylon Ball Bearing Roller

- Roller Will Not Rust or Corrode
- Installs By Snapping Into the Existing Door Frame Corner
- No Tools Required for Installation

**Description:** Overview This spring tension roller assembly is used by DorWal, Guardian as well as a variety of sliding patio door manufacturers. It has a flat tension spring, steel housing and a 1-1/4 in. high-density polyethylene roller. The roller installs into the door by snapping onto the existing diecast door frame corner. Used as top or bottom rollers. Use Prime-Line part B 514 for the 1 in. version.
