

# **1" Steel Ball Bearing Roller Sliding Screen Door Roller Assembly**

**Item No. B727**

## **Features, Advantages, and Benefits**

- Compatible With Left and Right Hand Sliding Screen Doors
- Ideal for Replacing Corrosion Frozen Hardware
- Features Full Height Adjustability
- Constructed of Stamped Steel

- Equipped With Concave (Grooved) Edge Steel Wheel
- Easy to Install in Less Than 30 Minutes With a Few Simple Tools
- Includes Simple Diagram and Installation Instructions

**Description:** Overview This sliding screen door corner roller assembly is constructed of stamped steel and it includes a steel ball bearing roller attached to one end. The roller features a concave (grooved edge), and it is fully adjustable. This corner assembly is used by Metal Industries patio door manufacturer, and a variety of others. It measures 1 in. in diameter and it is 9/32 in. thick. The corner fits into the sliding screen door frame and holds the horizontal rails together with the vertical side stiles.
