

## **White Plastic Housing with Stainless Steel Sliding Screen Door Roller**

**Item No. B751**

### **Features, Advantages, and Benefits**

- Used on Andersen 200 and 400 Series Screen Doors
- Height Adjustment is Down on the Side
- 1 in. Diameter Stainless Steel Roller
- High Density White Polyethylene

- Easy to Install
- Mounting Hardware Included
- A Phillips Head Screwdriver is Required for Installation

**Description:** Overview This Andersen roller assembly is an insert style with mounting tabs and included installation screws. The high-density polyethylene housing has an aluminum inner housing with a 1 in. high density stainless steel roller. This roller assembly was used on the 200 Series Perma-Shield gliding doors and 400 Series Frenchwood doors. Height adjustment is down from the side rather than the top or the edge of the door.
