- CONTEMPORARY DESIGN – Featuring a sleek and discrete tie-down screw at the bottom of the handle.
- EASY INSTALL – Includes a 1-3/4-inch hole center to easily align and install.
- SLEEK DESIGN – Designed with a stylish black finish to fit any door design.

Description: Overview This Prime-Line push button latch series is constructed with a contemporary design suitable for a variety of door materials. It is built for use with out-swinging screen and storm doors made of wood and metal that range from 7/8" to 1-1/4" thick. The door fasteners and tie-down screws are created from a zinc compound with a stylish black finish. The tie-down screw at the bottom of the handle adds strength and durability to the push button latch, ensuring proper functionality for the life of the unit.
