- The Mounting Holes are 2-1/4" on Center
- Diecast Metal Construction with An Almond Finish

- Has a 3/8" Offset
- All Necessary Mounting Hardware is Included
- A Phillips Head Screwdriver is Required for Installation

Description: Overview This window sash lock is constructed from die-cast metal and comes in an almond finish. The lock does not use a separate keeper like a variety of other sash locks, as it engages and secures into the rail of the secondary sash in your home or office. Each latch features a 1/2 in. tongue projection, and it is typically used on aluminum and vinyl sliding windows.
