- Left Handed As Viewed Form Inside Looking Out
- Diecast Construction in Bronze

- Matching Handle Use Item No. H 3544
- Sweeping Handle Has a Comfort Grip
- A Phillips Head Screwdriver is Required for Installation

Description: Overview This is a left-handed casement locking handle in a bronze finish with mounting holes 2-3/8 in. on center. The handle is diecast construction with the handle sweeping slightly to the left. This allows a more comfortable grip to open to the left when there are dual casement windows with a center rail dividing them. For the matching right-hand casement locking handle see Item No. H 3544.
