

FHC Window Screen Hanger - Top Mount (4 Sets)

Item No. L5791

Features, Advantages, and Benefits

- Used for hanging screens on wood window frames
- 1-1/8 in. wide with 3/8 in. projection
- Milled aluminum finish
- Stamped aluminum construction

- Hooks install on window frame and keepers mount to screen frame

Description: Overview These window screen hangers are constructed of stamped aluminum and they come in a milled aluminum finish. They feature a top mount design with a J-hook keeper, allowing for easy hanging and removal of wood-framed window screens. These hangers feature a 3/8 in. projection at 1-1/8 in. wide, and they are commonly used together with Prime-Line's hook and eye latch (Prime-Line part L-5535, purchased separately), for latching of wood screens to wood window sills. All fasteners are provided for installation of these wood screen hangers, and they are simple to install.
