- Designed for Use with Lightweight Hinged Doors, Panels, Chests, Cabinets and More

- Some Drilling and Chiseling May Be Required for Installation
- Features a Spring-Loaded Latching Design to Provide Secure Holding Power
- For Further Dimensional and Specification Information, Please See The Line Drawing

• **Description:** Overview These screen frame top hangers and latch are constructed of aluminum and come in a white painted finish. They are used for the installation of aluminum screen frames on vertical and horizontal sliding windows, such as on single hung, double hung and sliders. The hangers install with one nail-in fastener each, and they fit 7/16 in. thick screen frame material. The latch installs into the spline channel and locks onto a ball head fastener that installs on the bottom sill.
