

# FHC Capillary Breather Tubes for Insulated Glass Units - 100pk

**Item No.** CT3003

## **Features, Advantages, and Benefits**

- Equalizes the Pressure Between The Inside and Outside of an I.G. Unit
- Elevates Atmospheric Pressure from Altitude Variances, Minimizing Glass Deflection
- Reduce the chances of Visual Distortion and Seal Stress
- Stainless Steel Capillary Tubes are Inserted into the Spacer, Generally, Near the Corner Key
- The 12" length and .021" (0.53mm) Small Bore Reduce the Vapor Transmission Rate
- Also Available in 1000/Bulk Pack [CT3003M](#)
- See The Link Below for Instructions and Understanding I.G. Capillary Tubes
