

FHC Standard Plated Diamond Drill

Item No. SPDD

Features, Advantages, and Benefits

- Industries Most Popular Production Glass Drill Bits
- Most Commonly Used Sizes Available
- Durable Diamond Plating for a Longer Life
- Designed To Be Used Production Style Drilling Machines

Description: <h2>Overview</h2><p>The SPDD Series Diamond Plated Drill Bits heavy layer of diamond coating enables this bit to drill many holes in glass when

maintained and used properly. Glaziers Tip: Although plated, these bits can be sharpened one time with a dressing stone to expose some of the remaining diamonds and extend the working life. Other features include 3/8" shaft and a knock-out hole for easy spent plug removal. All diamond bits must always be used with suitable diamond coolant applied by spraying or immersing the bit while drilling. These bits are designed

the FHC3 Tripod Glass Drilling
