- Restroom partition hardware used to replace damaged or missing U-shaped wall brackets used for installation of panel components

- For use with 1 in. thick panels. Measures 54 in. in length (height), 5 hole count
- Stainless steel
- Bracket requires 5 bracket-to-wall fasteners and 5 bracket-to-panel through bolt fastener sets; not included with bracket

**Description:** Overview These U-shaped wall brackets are constructed of 18 GA., continuous roll formed stainless steel material and come with a 5-hole installation pattern. They feature an inside width of 1 in., designed for installations of 1 in. thick panels, and they come with a peel-away plastic liner to protect their finished surfaces during shipping and installation. Roll formed wall brackets like these are used by many, and are simple to install. U-brackets like these are used to replace damaged, or missing installation wall brackets, and for new installations of restroom partition panels. This item includes one 54 in. long, U-shaped bracket per package only. Easy to install.
