Features, Advantages, and Benefits

- Components of this latch and pull set are constructed of plastic and steel components, to include steel fasteners
- Housing and sliding lock tab come black in color, standard to most screen door latch and pull sets, with a corrosion resistant steel latch

- Designed for use with sliding patio screen doors, with both left and right hand directional sliding
- Features simple install and use design
- Easy to install with only a few simple tools

Description: Overview This internal or mortise style latch assembly has a plastic body with a rotating steel latch. It installs into a slot or mortise in the edge of the sliding screen door. Mounting holes are 3-7/8 in. on center. The lever fits through the door frame and into the latch assembly. The latch hook rotates upwards to engage the keeper installed on the door jamb. For the keeper use Prime-Line part A 127.
