Description: Overview This spring-loaded latch and pull assembly is constructed of plastic and comes black in color. It features a security night lock and a spacer for installation on doors with “hat-section” applications. This non-handed latch and pull assembly is designed for mortise-type installations on 1 in. thick extruded aluminum screen doors manufactured by Anjac doors. Non-handed latch and pull assemblies like this one can be installed on both left and right-handed sliding screen doors. See Prime-Line part A-108 for 1/2 in. thick x 1-5/8 in. wide frame material with a short 3/16 in. hook latch, and Prime-Line part A-192 for 1-3/4 in. wide frame material with a longer 5/16 in. hook latch.
