

## **FHC Sliding Door Tandem Roller Assembly - 1-1/2" Steel**

**Item No.** D1876

### **Features, Advantages, and Benefits**

- 1-1/2 inch concave (grooved) steel rollers
- Ball bearing
- Stamped steel unique housing with side adjust
- Mounting tabs on each end

- The housing is 11/16 inches wide, 1-3/16 inches tall and 4-5/8 inches long

**Description:** Overview This is a unique housing tandem roller assembly often found on Andersen patio doors as well as several other manufacturers of wood patio doors. It has two 1-1/2 inch concave steel ball bearing rollers set in a stamped steel housing with side adjustment . The housing is 11/16 inches wide, 1-3/16 inches tall and 4-5/8 inches long with 1 mounting tab at each end of the housing. When the housing is inserted into the mortised area in the bottom rail, screws are used to fasten it in place.
