

FHC Sliding Window Slam Latch - 3-5/8" Hole Centers - Diecast Zinc - White - (Single Pack)

Item No. F2686

Features, Advantages, and Benefits

- Fits vertical sliding windows constructed of aluminum and vinyl by International Window Corporation (IWC)

- These locks mount on the check (or “meeting”) rails of single and double hung sash where their checkrails rest flush when closed
- Replacing loose-fitting, worn or missing sash locks can help restore and increase the safety and security of the home or office
- Features a self-engaging, automatic-latching mechanism to help ensure secure locking of fully closed windows
- Both the lock body and keeper have mounting holes that are spaced apart at 3-5/8 inches, on center

Description: Overview Do you have single or double-hung vertical sliding windows with loose-fitting, worn or missing slam latches? Besides adding a “new look” to your windows with a fresh set of locking hardware, these slam latching sash locks can help add peace of mind by restoring the security features on your vertical sliding windows that were manufactured by International Window Corporation (IWC). Each lock features a self-engaging, automatic latching mechanism that mounts on the checkrails (or meeting rails), of the pair of sash. These latches are constructed of diecast zinc and come in a corrosion-resistant, industry standard, white-painted finish to match other existing hardware that may already be in the home or office. Each set includes one latch, one keeper, installation fasteners and simple instructions. Installation of these slam latch sash locks is quick and easy, and it can be done with a simple handheld Phillips head screwdriver. Other design features include a 5/16 inch narrow keeper, spring-loaded latch, and 3-5/8 inch mounting hole centers. Compare the style and dimensions of this lock to those required on your sliding windows and order yours today.
