Description: Overview These channel balance accessory kits include components constructed of nylon and steel, and are used in combination with double hung and single hung, vertical window channel balances. Each kit includes 1 nylon top guide (Prime-Line part FS101), 1 nylon bottom guide (Prime-Line part FS153), 1 steel take-out clip (Prime-Line part FS260) and 2 metal rivets (Prime-Line part FS261). These channel balance accessories are used by many manufacturers and service centers to replace damaged components, and for the construction of new single and double hung windows designed with vinyl liners and channel balances.
