- The wheels of these roller assemblies have a 1-13/16 outside diameter
- Constructed of steel
- Equipped with steel ball bearings
- Easy to install in less than 30 minutes with a few simple tools

Description: Overview These heavy-duty garage door rollers are constructed of steel wheels and rods and they include steel ball bearings. The wheels measure 1-13/16 in. in diameter, the shafts are 6-13/16 in. long and measure 7/16 in. in diameter. Each roller is equipped with a steel inner race and factory lubricated steel ball bearings. Garage door rollers like these are used on side by side hinge placements for added strength.
