- Locks onto operator spindle with set screw
- White painted finish
- Handle constructed of diecast zinc
- Features split shaft fold-over design
- Folding crank handle will not interfere with window coverings

Description: Overview This split shaft, folding operator crank handle is constructed of diecast zinc and comes in a white painted finish. It is designed to fold over when not in use, allowing for unobstructed use of shutters, shades and blinds of various types. This folding crank handle fits casement and awning window operators with 11/32 in. spindles. The crank features a set screw at the base of the handle allowing it to lock onto the spindle, and a swivel knob at the tip for ease of operation. The reach on this crank measures 3-1/4 inches. This operator crank handle is easy to install and used by many.
