

## **FHC Plunger Latch Step Drill - 1/8" To 7/32" (Single Pack)**

**Item No.** L5628

### **Features, Advantages, and Benefits**

- Constructed of hardened steel to provide durable and lasting usage
- Used to drill two different diameter holes in one pass
- Features a 1/8 inch diameter which drills through both layers of aluminum screen frame, and a 7/32 bit diameter for drilling through top layer of screen frame

- Designed for use with hollow aluminum screen frames
- Easy to install with only a few simple tools

**Description:** Overview This step drill by Prime-Line Products is constructed of hardened steel and features two diameters in one, for specifically for use when installing aluminum screen plunger bolts. It is used to drill 2 different diameter holes in one single pass for installation of screen plunger bolts into the screen frame. The drill diameters include a 1/8 in. and a 7/32 in. bit diameter, and the larger diameter is only intended to pass one layer of the hollow aluminum screen frame. For best results, follow the installation instructions included with each package.
