- Design slides into slot in the frame of the door
- 3/4 in. ball bearing roller
- Extruded aluminum bracket and nylon roller
- Roller height is adjustable along the diagonal slot
- Top hung design

**Description:** Overview These shower door roller assemblies are constructed of nylon tires, steel ball bearings and extruded aluminum brackets. They are designed for use with tub enclosure doors manufactured by Premiere Shower doors. These top hung roller assemblies help restore smooth operation to sliding shower doors. Tub enclosure roller assemblies like these are also available with flat edge tires and other types of mounting brackets. These brackets slide into a slot at the top of sliding shower door frames.
