

FHC Screen Table Jig Set - Aluminum

Item No. P7924

Features, Advantages, and Benefits

- Constructed of aluminum for durability
- Allows screen frame to be held firmly and squarely in place while installing screen wire
- Includes five extruded aluminum bars and 12 jig clips for 3/4 in. screen frame
- For further dimensional and specification information, please see the line drawing

Description: Overview This screen table jig set by make-2-fit is constructed of extruded aluminum and comes in a mill finish. Using a bench top jig set like this one allows the screen to be held firmly and squarely in place while installing screen fabric. The set includes five bars (two bars are drilled for fastening to the workbench table, and three are free moving bars), and 12 movable aluminum screen frame clips for 3/4 in. frame. This set is easy to install.
