- Steel ball bearing rollers with hardwood handle (color of wood may vary)

• Easy to use

Description: OverviewThis is a professional grade screen rolling tool with wood handle primarily used for installing aluminum or fiberglass screen fabric into window screens and screen doors. Designed for production usage, it is a specialized combination rolling tool with a 2-1/2 in. \times 1/16 in. convex nylon roller and ball-bearing hub at one end and a 2 in. \times 3/32 in. concave nylon roller and ball-bearing hub at the opposite end. To be used with vinyl screen spline sizes 0.115 in. up to 0.165 in.
