

**FHC Extension Spring - Spring Steel  
Construction - Nickel-Plated Finish -  
0.105 Ga x 1-1/8" x 16" - Closed Single  
Loop - (1-Pack)**

**Item No. SP9645**

**Features, Advantages, and Benefits**

- For use in a variety of applications; appliances, automotive, marine, toys, tools, mechanical devices, contraptions and more
- These extension springs are designed with single loop closed ends for easy and reliable fastening to fixed and moving parts
- Spring dimensions: 1-1/8 in. outside diameter, 16 in. length, 0.105 in. wire diameter, 31.2 lbs. maximum safe load, 22 in. maximum deflection
- All springs come in a beautiful, corrosion resistant, nickel plated finish allowing them to be used both indoors and out
- Constructed of durable spring steel (tempered steel wire) to provide optimum retraction when stretched
- Designed for use with hinged screen doors, but can be used on a variety of other household and professional applications

**Description:** Overview These Handyman Single Loop Closed Extension Springs by Prime-Line Products are constructed of durable spring steel, and they come finished in a beautiful, corrosive-resistant, nickel-plated finish. Springs like these are used for a variety of household and professional applications, and they feature a generous deflection length of 22 inches. These springs are easy to install and are used by many. The outside diameters, lengths and gauge thicknesses vary between each of these springs, while their dependability does not. Use these springs for repairs around the house, in the office, vehicle, garage and in many other applications.
