

# FHC Folding Crank Handle For 11/32" Spindle Casement And Awning Window Operators - Diecast Zinc - White Enamel Finish (Single Pack)

**Item No.** TH22253

## **Features, Advantages, and Benefits**

- **FITS 11/32" SPINDLES** - Prime-Line folding crank handle is designed to fit 11/32" Truth brand operator spindles. It has a 2-9/64" reach with a 3-3/32" projection.
- **LOW-PROFILE DESIGN** - The unique design of the casement and awning window crank allows it to fold down when not in use, making it exceptionally low-profile. Shades, blinds, shutters and more can go straight down to the window sill without getting caught on the handle.
- **USES LESS TORQUE** - The TH 22253 crank features a set screw at the base of the handle allowing it to lock onto the spindle, and a swivel knob at the tip for ease of operation. It requires far less torque than traditional low-profile handles.
- **CORROSION-RESISTANT** - Prime-Line window operator folding crank is constructed of diecast zinc with a baked-on white enamel finish. It is engineered to resist rust and corrosion.
- **EASY TO INSTALL** - The non-handed window operator folding crank is extremely easy to install and all mounting hardware is included.

**Description:** Overview With the unique Prime-Line TH 22253 Window Operator Folding Crank Handle, you never have to worry about your shades and blinds being obstructed by the handle and not sitting flush with the window sill. Constructed of diecast zinc and extremely low-profile, the casement and awning cranks are designed to fit 11/32" Truth brand operator spindles and have a 2-9/64" reach with a 3-3/32" projection. It features a set screw at the base of the handle allowing it to lock onto the spindle, and a swivel knob at the tip for ease of operation, requiring far less torque than traditional low-profile handles. The unique design of the non-handed casement and awning window crank allows it to fold down when not in use. Shades, blinds, shutters and more can go straight down to the window sill without getting caught on the handle. Ideal for plantation shutters, retractable blinds and mini-blinds, the handle easily pulls out from its folded position to open or close the window. The white-enamel finish is baked on, creating a rust and corrosion resistant crank that is engineered to last.

Installation is quick and easy, and all mounting hardware is included.
