- Designed for use with sliding panel and door systems

- Features an innovative design that helps prevent the lifting or jimmying of doors
- Easy to install with only a few simple tools
- For further dimensional and specification information, please see the line drawing

**Description:** Overview This Out-Swinging Latch Guard by Prime-Line Products is constructed of a heavy gauge stamped stainless steel and comes in a subtle, corrosion-resistant satin finish. This security device is of a simple design, but it helps to protect doors against forced entry. It is used on out-swinging doors and features a standard residential 2-3/8 in. backset. This security latch guard may be used on both solid and hollow doors, constructed of metal or wood. For best results, follow the installation instructions included with each package.
