- Ideal for strengthening jamb at deadbolt area
- The deadbolt rectangular opening on this strike measures 3/4 in. x 1-1/16 in
- The net size of the deadbolt strike measures 1-1/4 in. x 3-5/8 in

- Constructed of heavy gauge stamped steel

**Description:** Overview This is a Trimline cam lock made of high pressure, corrosive resistant diecast zinc. It features a baked on white enamel finish. A concealed locking mechanism pulls rails together helping to reduce air infiltration. The alignment lugs prevent side shift of the sash, and the slim-line design for narrow rail application. With a lower profile it allows maximum sash opening. Mounting holes are 2-1/16 in. on center, with an 11/16 in. hole backset.
