**Description:** Overview This Prime-Line U 9426 Maximum Security Latch Strike is constructed of stamped steel and comes plated in a brass finish. This security strike is designed to replace a standard strike plate for maximum security. Installation of this strike strengthens a locked door with six 3 in. long screws that attach to the jack/trimmer stud to help prevent kick-ins. Some mortising and pilot hole drilling may be required for flush install. For further dimensional information, please see the line drawing.
