

FHC Asa Commercial Stainless Steel Strike Plate (Single Pack)

Item No. U9483

Features, Advantages, and Benefits

- Used to replace standard strike plates to offer improved security
- Four 3 in. long screws
- Fastens into jamb and outer door frame
- Stamped steel with bright brass finish

- Helps prevent a forced entry

Description: Overview This is a maximum security deadbolt strike that is constructed of stamped steel and it comes in a brass plated finish. Designed to replace a standard strike plate for maximum security. Installation of this strike strengthens a locked door with six, 3 in. long screws that attach to the jack/trimmer stud to help prevent kick-ins. Some mortising and pilot hole drilling may be required for flush install. All the necessary mounting hardware is included for a quick and easy installation.
