

FHC 2-1/8" Stamped Steel Brass Plated Adjustable Strike (Single Pack)

Item No. U9486

Features, Advantages, and Benefits

- For use with hinged (swinging) doors
- Adjustability of this strike plate provides a snug fit of door to jamb
- The overall height of this strike measures 2-3/4 in. from top to bottom
- Constructed of stamped steel and comes in a brass plated finish

- These adjustable strike plates can be used on both residential and commercial door frames, like those manufactured by Roberts Redi-Frame and Timely metal frames

Description: Overview These strike plates are constructed of stamped steel and come in a brass-plated finish. They feature an adjustable depth to allow for snug-fit adjustments of door to jamb latching. Using strikes like these help eliminate rattling of doors when loose fitting latch engagements are present. Can be used on both residential and commercial frames such as Roberts Redi-Frame and Timely metal frames. All the necessary mounting hardware is included for a quick and easy installation.
