- All components come in a beautiful, corrosion resistant, white painted finish
- Lock, holder and keeper are constructed of stamped steel
- Allows viewing and ventilation

**Description:** Overview This Texas Security Bolt Lock by Prime-Line Products is constructed of stamped steel and comes in a beautiful, corrosion-resistant, white painted finish. It is a maximum security locking device that is designed for use with inswing doors. This locking hardware installs into jamb jack stud with 3-1/2 in. long screws, to ensure the strongest hold. When the ring is engaged into the lock plate, it is designed to block the in-swinging door from opening, and it meets Texas apartment codes. For best results, follow the installation instructions included with each package.
