

FHC Steel - White - Keyed Chain Door Guard (Single Pack)

Item No. U9872

Features, Advantages, and Benefits

- Components of these security door locks are constructed of steel, diecast and brass materials
- Comes in a beautiful, corrosion resistant, white finish
- Designed for use with hinged swinging entry doors
- Features a keyed locking mechanism that allows the security device to be unlocked with its keys from the exterior
- Easy to install with only a few simple tools

Description: Overview This is a locking chain door guard. It is constructed of a steel chain, and diecast metal housing, plate and keeper. Comes in a white-painted finish. The lock engages by allowing the bolt to slide into the keyed mechanism to lock. Can be unlocked from the exterior of the door with the key. Uses a B1 keyway, ILCO (1098M). This chain door lock allows a door to open slightly for safe viewing and ventilation. Installation of this lock placed out of children's reach will help prevent them from opening a door themselves to enter or exit into dangerous areas. All installation fasteners are included, and it can be used on a variety of door types, on or beside the door casing.
