Item No. U9882

Features, Advantages, and Benefits

- Used on the back of sliding patio doors to secure it in position
- Securely locks sliding patio door in closed or ventilating position
- Convenient foot operation
- Diecast painted aluminum
- Locks and unlocks with supplied key

Description: Overview This is a keyed step-on sliding door lock. The steel bolt securely locks your door in a closed or ventilating position. Convenient foot operated design. Allows you to lock your door or open it slightly and still allow ventilation while keeping your home secure. Helps to prevent unwanted sliding and lifting of the door. All the necessary mounting hardware is included for a quick and easy installation. Unlocks with provided key. Uses B1 keyway, ILCO (1098M).
