

FHC Pr1" x 2" Stamped Steel Antique Brass Plated Finish Window Flip Lock

Item No. U9929

Features, Advantages, and Benefits

- Double hung flip locks like these are most commonly used on wood-constructed single and double hung vertical sliding windows
- This lock features a wedge-shaped hinged flaps which are designed to stop the sash from sliding

- Universal design allows this lock to be used on windows by multiple manufacturers
- Constructed of stamped steel
- Please refer to the line art drawing for dimensions and compare with your needs before ordering

Description: Overview This window flip lock is constructed of stamped steel and comes in an antique brass finish. Features a simple to install, and simple to operate design for use on vertical sliding (single and double hung) wood windows. Upon mounting this lock on the stile face, towards the bottom of the upper sash, it creates a wedge between the top and bottom sash preventing the bottom sash to be lifted. The hinged wedge design can be swung opened to allow for opening of lower sash. Designed for use on single glazed/single pane vertical sliding wood windows for ventilation, or secondary locking purposes.
