Description:

Overview

The **FHC 1/4" Aluminum Standard Nose J-Channels** are unique popular metals that have been used in the Industry for years. The 1/4" Standard Nose Aluminum J-Channel is commonly used for mirror installations using the Inset-and-drop method by using the Deep bar on top and Standard regular shallow channel on the bottom. p></p> * These versatile extrusions combined with other components are not only exclusive for Industrial / Commercial applications but also very popular for Residential and other applications that require protection around the edges. At **FHC** we strive to help in keep your cost down and stock what you need for all your job needs. </p><p></p> <p>* Always wear the correct safety gear to protect yourself. Failure to do so may cause serious operator injury * p></p> * Product info might vary from actual material. p></p>* Please contact us if there's any concern. </p>
