

# FHC Infrared Quick Temp Non Contact Sanitary Thermometer

**Item No.** FHC1T

## **Features, Advantages, and Benefits**

- Non-Contact Infrared Thermometer
- 1 Second Testing, Quick and Accurate Results
- Measures Body Temperature 3-5cm From Forehead
- High Temperature Alarm Triggers for Readings Above 100.4 Degrees
- Saves the 32 Most Recent Results
- LCD Display with Three Color Backlights
- Displays Either Celsius or Fahrenheit
- Will Function up to 100,000 Readings
- This Item is Not Eligible for Returns

**Description:** Overview The FHC1T Non-Contact Infrared Thermometer was developed with the latest infrared technology. This allows the thermometer to measure temporal artery (TA) temperature at a distance of 1.2-2in (3-5cm) from the forehead. The precise, instantaneous and non-contact features of this thermometer allow taking multiple temperature readings in quick succession without the risk of cross-contamination. **WARNING: Cancer and Reproductive Harm.
