Description: OverviewThe SUI Series heavy-duty, vertical lift transaction windows are the perfect pass-through windows for multiple service areas, walk-up service counters, and areas with limited space. The SUI window is also available in flexible custom sizes to help best suit your application and is suitable for interior and exterior applications.The QSSU 'hands-free' automated transaction window includes an optic sensor in the header of the window which will detect your presence and automatically open the window to allow you to serve customers and automatically close when you walk away from the window. This window includes our Logic Lock with three operational modes:Standard: Allows the 'hands-free' operation of the window through the optic sensor.Peak Period: Opens the window and keeps it open until this mode is disengaged.Night Latch: Disengages the optic sensor and engages a plunger lock to secure the window. The QSSU1200 manually-operated, vertical lift transaction window includes a 7" aluminum handle and will remain open at the height of your choice.
